

Anno scolastico:
2018-2019

Once more the **English language** has been able to make magic come true at Malignani Technical and High School, mingling together such different people, countries and traditions like the Chinese, the Ukrainian and the Italian ones, otherwise so distant one from the other.

Thanks to the very skilled and professional teachings of two volunteer university students, **Maryna** from Ukraine and **Katherine** from China, ranging from PPTs and video presentations, team and pair work activities and cross border debates based on involving current issues, **more than 750** students from **37 different classes**, both of Technical Institute and of High School, have had the possibility to take part in this very challenging and exciting experience of learning new topics in English from other teachers and, consequently, from other perspectives.

Thanks Maryna and Katherine for having shared with us your lives and your skills. A special thank must also go to the girls' two hosting families, **Bertoli/Toso** and **Mondini**, who have made all this possible and have always given help and support, whenever it was needed.

Good bye Maryna and Kathrine, we wish you all the best for your future projects and we all hope to see you again!

The students and staff of "A. Malignani" Secondary Technical and High School
